Quality Certification

Jharkhand Grindchem conforms to international standards for quality assurance and work safety

R & D and Quality Assurance

With the support of M/s. Intocast , we have modernised our facilities with latest equipment to become as one of the best R & D facilities to develop this type of product in India

Laboratory

Well-equipped quality control and development facility. Most modern process and our certified quality management system guarantee higher satisfaction to the customers. We use latest equipment to check incoming material as well as finished product.

Products

Mould powder and Granules (for open casting)

Our casting powder can substitute oil in steel open casting . Our casting powder is characterised by low density and fast melting rate , which immediately produce liquid slag which acts as lubricant.

Mould Powder and Granules (for Close casting)

JGPL manufacture casting powder and granules for casting steel (all grades) at one location in Jamshedpur. We apply most stringent quality standards during manufacturing process to ensure consistent quality.

Punctual Delivery

We are dedicated to the job and take the challenge to serve our customers by delivering our products within time limit.

Products

- Bottom Pouring compound for Ingot casting (all ingot size and steel grades)
- Insulating covers for tundish & ladle (acidic and basic)
- Synthetic Slag for secondary steel making
- Starter powder
- Bottom Cleaning compound (for hot metal ladle and steel ladle)
- Top ring removal compound (for hot metal and steel ladle)
